Fitness for paws

Individual & group dog walks

It's a fact that pets often gain a few extra pounds over the cold winter months due to less exercise.

A short walk or run at least three times per week is plenty for a good workout and meaningful health benefits. Regular mid-day exercise BENEFITS your friend in many ways:

1. maintains and improves health;
2. promotes interaction and socialization with other dogs and people instead of being cooped up alone inside all day;
3. ensures a more relaxed state at night; and
4. prevents possible

medical conditions that might arise from having to "hold it" all day or a possible mess when "holding it" becomes impossible.

Make your dog happy and healthy by giving it the paw-fect gift it deserves; our ***Fitness For Paws*** dog walk service starts at just **\$15 per walk**.

Puppy paws breaks

Mid-day puppy breaks

We know how challenging it can be to care for a new puppy while working long hours during the day. Let us help you! There's no time better than summer to get your puppy used to going outside to play and do its business. Puppies have under-developed bladders, and are required to drink lots of water, which also means that they will need to be let outside more often than adult dogs. You no longer need to worry about leaving your puppy home alone during the hot weather or wonder if it has enough sustenance? and fresh air for the day. You also won't need to be concerned about cleaning up accidents after your long day at work. Our sitters will make sure your puppy is hydrated, fed, exercised, and given plenty of fresh air and TLC during your absence. Our ***Puppy Paws Breaks*** service starts at just **\$15 per visit**.
